We are very happy about the positive outcome resulting from the support of many CIAV and ICOMOS members for Marc’s candidacy to the ICOMOS Advisory Committee in Malta. I want to offer my gratitude to the following:
Blanca Niño from Guatemala, Sivan Arie from Israel, Lijun Wang from China, Luc Pecquet from France, Randi Sjolie from Norway, Sudjit Sananwai from Thailand, Virginia Flores from Santo Domingo, David Guggenheim from Jerusalem, Amund Sinding Larsen from Norway, Grønn Unni from Norway, Dag Nilsen from Norway, William Chapman from Hawaii, Miles Lewis from Australia, Paul C. Cloyd from the USA, Esteban Prieto from the Dominican Republic, Mariana Correia from Portugal, Guido Licciardi from the USA, Nelson Melero from Cuba, Deirdre Conroy from the USA, Gisle Jakhelln from Norway, Maria Ines Subercaseaux from Canada, Spencer Leineweber from Hawaii, Hossam Mhady from Egypt, Ruben Abela from Malta, Martin Cernansky from the Czech Republic, Rene Luis Mata from the Philippines, and Samir Abdulac from France.

We would like to congratulate Marc de Caraffe for having been elected Vice President to the ICOMOS Advisory Committee.

Additionally in this issue, we have included information about our next CIAV meeting which will be held in Norway from May 31st to June 4th 2010 which has been organized by ICOMOS Norway, ICOMOS Sweden and ICOMOS Finland. Please note that there will be two options for the post tour, both of which seem very interesting. I encourage all of you to come to Scandinavia in 2010 and participate in our annual meeting and seminar.

We would like to welcome Felicia Chateloin from Cuba, who is a new CIAV member.

In recent news, this week we saw the CIAV web page renovated and actualized by our Czech Republic colleague Martin Cernansky, we thank you very much Martin for your important contribution.

Finally, I want to mention that we have conducted elections in the Mexican ICOMOS National Committee and that two women have been elected to the Executive Committee. The new President is Arch. Olga Orive, and I, myself, have been elected Vice President.

Dear colleagues: please prepare some articles, news, or perhaps only photographs for our next Newsletter. Maybe it is time to open a specific space to “Letters to the Editor” and “Pictures of the Month”. What do you think of this proposal?

Best regards,

Valeria Prieto

Tomonoura Port, Japan

Mexican ICOMOS Elections

Heritage 2010 – 2nd International Conference on Heritage and Sustainable Development

Conference Structural Health Assessment of Timber Structures – Shatis, in Lisbon, Portugal
1. Marc de Caraffe as Candidate

When I sought the advice of CIAV members on my candidacy, I received these wise words from Professor Masaru Maeno, “sustainable conservation of cultural heritage requires an outsider’s worldwide eyes and an insider’s focused eyes on the people’s mind.” My interpretation of Maeno Sensei’s words is that if elected vice president, I should focus my work on both the requirements of our organization and on the needs of ICOMOS members by improving the direct and open cooperation between national committees and international scientific committees.

As president of the vernacular committee, I have constantly shown my great determination to maintain open communications among CIAV members and with other ICOMOS committees. If elected vice president of the advisory committee, I will keep working on maintaining the same level of openness in communications between national and scientific committees.

I firmly believe that the activities of ICOMOS need to be better known by its members and by the general public in order to reflect more adequately the role of the organization. It is also of the greatest importance that we share our common experiences from one country to another in order to create a stronger bond among national committees. Because they are built through constant consultation and by consensus, these partnerships, based on mutual respect, can only serve our mutual objectives.

I see the role of the vice president as serving the needs of the members of the ICOMOS advisory committee, and I am totally resolute to this objective. If elected, I can assure you that I will cooperate effectively with the president of the advisory committee and that I will work as hard as I can for the benefit of the organization and its members.

Marc de Caraffe
2. CIAV Annual Meeting and Seminar

Finnskogen 2010

Theme: Vernacular Crossing Borders

Vernacular building is a way of expression that carries messages from one generation to another and a message of belonging to a culture. When people are taken to other places or they freely move, their culture and the way of expressing themselves is brought to a new environment. How does the vernacular expression answer to the new circumstances?

Built vernacular heritage is normally based on long traditions of the use of local materials and of their gradual refining processes. In our time ideas travel fast regardless the borders and they can easily be amalgamated to many local cultures. Are global markets a threat to the vernacular expression?

While saving some parts of the old and adopting some parts of the new the vernacular expression can become more dynamic and at the same time more conserved in the new circumstances. Is it true that cultures moving to new geographical areas are more conservative? How do we conserve in different countries the vernacular buildings that carry the same tradition?

The seminar will be held in Finnskogen area in Norway and Sweden. It has been the target of many studies for more than a hundred years because of its exceptional history, vernacular heritage and traditions that can be traced back to the origin of the settlers from Finland.

Lectures
The program and the talks start with the background for the migration, continue with description on the culture and its special elements, and finally description on the buildings and the landscape in the ‘new’ environment.

Are the ‘migrants’ more conservative than their ancestors?

1) Background, key note lecture on the built heritage of those people who stayed and 6 selected presentations on the sub-theme
2) Description of the culture, key note lecture on the built heritage of the settlers and 6 selected presentations on the sub-theme.
3) Description of the present day situation, key note lecture on the conservation of the built vernacular heritage across the borders and 6 selected presentations on the sub-theme.

Lectures on cases from other parts of the world. How to identify traces of background, integration and amalgamation in the physical heritage as well as the intangible heritage?
Excursion
Visiting farms by bus and by foot.

1. **Tvengsberget**, Grue kommune, Norway, largest smoke cottage in Scandinavia, built 1832
2. **Purala**, Torsby kommun, Sweden, second largest smoke cottage in Scandinavia, built c. 1750, addition ‘Swedish cottage’ c. 1850
3. **Juhola**, Torsby kommun, Östmarks, Sweden, farm with many buildings, house for living c.1750
4. **Östmark church** 1765. Visiting and opening the CIAV VERNADOC 2010 exhibition.
5. **Ritamâki**. Torsby kommun, Sweden. A smaller farm with original buildings and kept cultural landscape. The house for living built c. 1840. By bus and 30 min. easy walk from the road.
   Alternative, depending on the weather:
   **Kvarntorp**, Torsby kommun, Sweden. A somewhat larger farm.
   Alternative:
   **Käckåsen**. Torsby kommun, Sweden. A smaller farm with original buildings and kept cultural landscape. The house for living built c. 1860. By bus and 5 min. easy walk from the road. Recently carefully repaired roof with birch bark and shingles, smoke oven and -sauna in use. The owner is a professional carpenter and mason, Swede with Finnish and Norwegian roots, working in Norsk Skogfinsk Museum, and good guide in English.

Pre Congress Workshop
"CIAV VERNADOC 2010” measure-documenting camp organized by Markku Mattila. A two week workshop ahead of the seminar with the purpose of adding some practical activities to the CIAV meetings with the targets:

- To get young professionals to join CIAV activities and to create under the umbrella of CIAV an international network, where one can get practical help, when needed
- To raise the local interest and respect in the local building tradition and to show that it is internationally highly respected and irreplaceable part in the vernacular heritage of the whole world
- To learn the method by working it throughout the process
- To become acquainted with the expertise of the participants and to create international contacts for further work in the field
- To develop a method and models for international cooperation
- To produce high quality measured drawings and exhibit them in an exhibition at the end of the camp

Object:

- Measuring and drawing the cross border building tradition of Finnsylvania: the wooden church of Östmark / 1765.

3. New Members

We have a new CIAV member from Cuba: **Dra. Arq. Felicia Chateloin Santiesteban** who actually works at the Oficina del Historiador de La Habana, and which is a distinguish researcher on the vernacular architecture field.
4. Tomonoura Port, Japan

By Masaru Maeno

Dear colleagues:
We have received recently news about the Tomonoura Port in Japan, from Professor Masaru Maeno. The letter explains by itself, and I just want to congratulate our friend and colleague Maeno San for all the efforts he had made trying to preserve this natural and cultural landscape.
Valeria

Marc

There is a good information to ICOMOS friends about the Historical port Tomonoura in Fukuyama City Hiroshima Prefecture.
This problem had been on the trial by the Inhabitants 159 members plaintiffs in Tomonoura since 2007.
The judgment of court was as follow “The Hiroshima District Court on Thursday 1 October ruled against a prefecural and municipal government project to reclaim a scenic shore in the Tomonoura area of Fukuyama, Hiroshima Prefecture, acknowledging that the beauty of the area was the property of the people. As requested by the 159 members plaintiffs group, the court ordered Hirishima Gov. Yuzan Fujita not to issue a license for the reclamation project in the shore area, saying it would spoil the area’s beautiful landscape.” I believe that this good result obtained by good support from ICOMOS Friends.

This conservation problem at ICOMOS started by the resolution of CIAV Meeting 2004. And continued Xian Declaration 2005, ICLAFI 2006, QUEBEC Declaration 2008, and more continued to the letter of President ICOMOS Gustavo Araoz and CIAV President Marc De Caraffe for the Local Government Fukuyama City, Hiroshima Prefecture and Japanese Government. These were great support for the historical port, cultural landscape and the Tomo peoples. But the Local Government is steel keeping their project on Tomoport. I will report on the Judgment of court on Tomoport problem.

Best regards
JAPAN ICOMOS Masaru MAENO
5. Mexican ICOMOS Elections

On 13 August 2009, the General Assembly of ICOMOS Mexico elected a new Board. ICOMOS President Gustavo Araoz was present at the ceremony which took place in the Anthropological Museum, and was a very successful ceremony.

The Mexican Executive Committee was integrated as follows:

**Presidente:**
M. Arq. Olga Orive Bellinger

**Vicepresidente General:**
Arq. Valeria Prieto López

**Secretario General:**
M. Lic. J. Ernesto Becerril Miró

Also the Committee encloses five regional vice presidencies to take care of the different geographical regions and five thematic secretaries.
The Green Lines Institute is organizing the international event 'HERITAGE 2010 - 2nd International Conference on Heritage and Sustainable Development', that will be held at the City of Evora, Portugal, from 22 to 26 June 2010.

We would like to inform all authors interested in joining the event that Submission of Abstracts is now open until 30 November 2009.

Papers addressing the following topics are welcome:

For further detailed information, please visit the conference Website at http://www.heritage2010.greenlines-institute.org.

Thank you for your attention.

The Organizing Committee
Dear colleagues

On behalf of the organizing committee please find bellow the First announcement regarding the conference Structural Health Assessment of Timber Structures – SHATiS’11 that will take place in Lisbon, Portugal, between the 16th and the 17th of June 2011.

Scope and aims

Structural health assessment of timber structures embraces different procedures intended to evaluate the safety and serviceability of the structure and assuring, extending or sustaining its predicted service life. Service life sustainability can be promoted at the construction stage by incorporation of monitoring systems or by providing tools and procedures that can assist experts to deliver accurate reports about the structural condition and safety of timber structures in situations when due to visible deterioration or change of use the viability of these structures is questioned.

Conservation and assessment of timber structures is based on a multidisciplinary approach, embracing wood properties, wood degradation, performance of joints, timber structural behavior and timber design. This work often involves the need for reliable non destructive testing methods.

All the activities are carried out having in mind the need to provide information about the mechanical properties of timber members, the mechanical behavior of joints and to assess the conservation problems of the structure, which is essential to a reliable structural safety analysis.

The analysis will give guidance to the conservation, replacement or strengthening works needed to ensure an adequate safety level.

SHATiS’11 conference aims at bringing together researchers and professionals involved in the field, constituting a forum for exchanging of experiences and discussing of subjects related to the appraisal and conservation of timber structures, including innovative methods and application of new technologies for monitoring, diagnosis, repair and strengthening of timber structures.

Topics

Theme A: Codes and guidelines for structural safety assessment
Theme B: Learning from case studies
Theme C: Condition assessment of timber members and joints, including non-destructive methods
Theme D: Structural monitoring, conservation and strengthening

Organizing committee
Chairman: José Saporiti Machado (LNEC)
